

MONTHLY REPORT

PAR 204

2 Oct 64

SUBJECT: Contact Chip Printer

TASK/PROBLEM

1. Develop and fabricate a contact printer to expose 4- x 5-inch film chip prints with minimum loss of information from selected areas of high-quality roll negatives (up to 200 lines/mm resolution). Each chip will have a two-line title across one end: the first line human readable, and the second to repeat the first in machine-readable characters.

DISCUSSION

2. In accordance with customer's directive, message 2775, 18 August 64, effort on PAR 204 was terminated.

3. Effort up to 18 August 64 was directed toward preliminary investigation and preparation of revised technical objectives.

PLANNED ACTIVITIES

4. A report, Contact Chip Printer, PAR 204, documenting effort expended up to 18 August 64 will be published in November 64.

5. Authorization of actual expenditures up to 18 August 64 and estimated cost of report preparation will be requested in the near future.
